HSE Certificate in Process Safety Management

NEBOSH Process Safety Management

This process safety management qualification is the result of a unique partnership that brings together HSE's advanced technical 'high hazard' expertise with NEBOSH's ability to produce excellent vocational OSH qualifications. This course is aimed to give delegates a broad overview of accepted concepts and recognised industrial techniques for managing process risk. They will be able to recognise and contribute to the control of process safety hazards as a result of this. Our certifications are based on significant research with health and safety experts, employers, professional bodies, and regulators to ensure that they are relevant, rigorous, and achievable.

Who can do this course?

Anyone who needs to understand the principles of health and safety as part of their job will benefit from taking this qualification including: - Team leaders and supervisors, - HR professionals, - Facilities managers - Those training young people in a working environment
